

NORTHERN COPILOT ADVANTAGE

I will use AI responsibly.

Five common-sense commitments for using AI tools at work.

WHAT I'M COMMITTING TO

01 I will use only approved tools.

I will use AI tools that have been approved or demonstrated through this program – not personal accounts or consumer AI tools for work purposes.

02 I own the output.

AI can generate incorrect or incomplete information. I am fully responsible for reviewing, verifying, and taking ownership of anything before it leaves the organization.

03 I will keep sensitive data out.

I will not enter confidential, client, personal, or sensitive business information into AI tools until my organization has formally approved that use.

04 Professional judgment stays with me.

AI is a productivity aid, not a decision-maker. Final judgment and accountability remain mine.

05 When unsure, I will ask.

If I am uncertain whether a use of AI is appropriate, I will pause and ask rather than guess.

WHAT COMES NEXT

This pledge covers early exploration only. Your organization will develop formal AI policies and governance as the next step – those will revisit and replace this pledge.
