

NORTHERN COPILOT ADVANTAGE

Building better prompts.

Four building blocks. Stack them to get dramatically better results from Copilot. Not all four appear in every prompt - the more you include, the better your results will be.

GOAL + CONTEXT + EXPECTATIONS + SOURCE

01 Goal WHAT DO YOU WANT COPILOT TO DO?

Every prompt starts with a goal. Be specific about the action to orient Copilot immediately.

Draft an email...

Summarize this document...

Give me 5 ideas for...

02 Context

WHO'S IT FOR, WHAT'S THE SITUATION, AND WHAT EXPERTISE SHOULD COPILOT DRAW FROM?

Context turns a generic response into something that actually fits your situation. Naming the expertise or role you want Copilot to take on is often the single biggest quality lever.

For a non-technical manager...

To a client after a project delay...

Acting as an experienced HR advisor...

Like a senior financial analyst would...

03 Expectations WHAT SHOULD THE OUTPUT LOOK LIKE?

If you don't specify, Copilot will make its own choices – and they might not match yours.

5 bullet points

Under 150 words

Formal tone

04 Source WHAT SHOULD IT REFERENCE?

When you give Copilot something to work from, the output gets dramatically more specific and useful.

Based on the email above...

Using these meeting notes...

ALL FOUR, IN ONE PROMPT

1 Draft a reply email **2** to a client who's frustrated about a missed deadline . Keep it **3** under 150 words, professional but warm, with a clear next step , **4** based on the email thread above .

1 — GOAL **2** --- CONTEXT **3** EXPECTATIONS **4** == SOURCE

QUICK TIPS

Build your prompt one block at a time. Be as specific as you can. Practice with real examples from your own work.
